

CURRICULUM VITAE

1. Personal Details

Permanent Home Address:	12 Shderot Halamed-Hei, Haifa 3220404, Israel
Office Telephone Number:	04-8249656
Cellular Phone:	052-2825206
E-mail Address:	yeshurun@research.haifa.ac.il

2. Higher Education

a. Undergraduate and Graduate Studies

Period of Study	Name of Institution and Department	Degree
1989 - 1993	Psychology Department Tel-Aviv University, Israel	B.A.
1996 - 1998	Computer Sciences New York University, USA	M.Sc.
1994 - 1999	Psychology Department New York University, USA	Ph.D.

3. Academic Ranks and Tenure in Institutes of Higher Education

Period	Name of Institution and Department	R/Position
2000 - 2008	Department of Psychology, University of Haifa	Lecturer
2008 - 2015	Department of Psychology, University of Haifa	Senior Lecturer (with tenure)
2012	Department of Psychology, University of New South Wales, Australia	Visiting Academic
2013	ZiF Center for Interdisciplinary Research Bielefeld University, Germany	ZiF Fellow
2015 - present	Department of Psychology, University of Haifa	Associate Professor
2019	Research Institute of Electrical Communication Tohoku University, Japan	Visiting Academic
2021 - present	Department of Psychology, University of Haifa	Full Professor

4. Offices in Academic Administration

Years	Name of Institution and Department	Role
2005 – 2011	Department of Psychology, University of Haifa	Head of Cognitive Psychology M.A Program
2009 – 2011 2021 – present	Department of Psychology, University of Haifa	Head of Psychology B.A committee
2013 – present	Department of Psychology, University of Haifa	Head of Experimental Psychology Direct Ph.D. Program
2014 – 2017	Department of Psychology, University of Haifa	Head of Psychology Ph.D. committee
2017 – 2021	Department of Cognitive sciences, University of Haifa	Member of the steering committee
2021 – present	Faculty of Social Sciences, University of Haifa	Director of Idit – multidisciplinary Ph.D program

5. Scholarly Positions and Activities outside the University

Year	Memberships in Academic Professional Associations
2000 – present	Vision Sciences Society (VSS)
2013 – present	Israeli Society for Cognitive Psychology (ISCoP)

Year	Editorial Assignments
2009 – 2015	<i>Attention Perception & Psychophysics</i> – Associate Editor
2015 – present	<i>Journal of Vision</i> – Editorial Board Member

Year	Reviewing for Refereed Journals
2000 – present	<i>Acta Psychologica; Annals of the New York Academy of Sciences; Attention Perception & Psychophysics; Cognition; Experimental Psychology; Journal of Experimental Psychology: General; Journal of Experimental Psychology: Human Perception and Performance; Frontiers in Psychology; Journal of Mathematical Psychology; Journal of Vision; Neuropsychologia; Neuroscience & Biobehavioral Reviews; Neuroscience Letters; Perception; PLoS ONE; Psychological Research; Psychological Science; Psychonomic Bulletin & Review; Quarterly Journal of Experimental Psychology; Spatial Vision; Vision Research; Visual Cognition; British Journal of Psychology; Cortex; Current Opinion in Psychology; iScience; Neural Computation; Scientific Reports</i>

Year	Reviewing for National Funding Agencies
2004 – present	The Israel Science Foundation (ISF)
2005 – present	The National Institute for Psychobiology in Israel (NIPI)
2007	German-Israeli Foundation (GIF)
2008 – present	United States Israel Binational Science Foundation (BSF)

Year	Reviewing for International Funding Agencies
2014	Austrian Academy of Sciences
2017 – present	German Research Foundation (DFG)
2017	Yale-NUS Internal Grants

Year	National Grants Scientific Panel
2003 – multiple years	The Israel Science Foundation (ISF)
	United States Israel Binational Science Foundation (BSF)

Year	Membership in National Award Committees
2017 – 2020	The Council for Higher Education: Levtzion Scholarships

Year	Membership in International Scientific Advisory Board
2013 – present	Transregional Research Centre: “Cardinal Mechanisms of Perception: Prediction, Valuation, Categorization”, Giessen/Marburg, Germany
2021 – present	Research Centre: “Modal and amodal cognition: Functions and interactions”, Tuebingen, Germany

Year	Promotion Professional Committees
2017 – present	Ben-Gurion University
	Rupin College
	The Open University
	University of Haifa

Year	International Conference Program Reviewer
2009 – 2019	Vision Science Society (VSS)
2017	European Conference on Visual Perception (ECVP)

6. Conferences

a. Participation in International Conferences - Held Abroad

Date	Name of Conference	Place of Conference	Subject of Lecture/Discussion
April 1996	ARVO Annual Meeting	Ft. Lauderdale, FL, USA	Effects of pre-cueing the target location on the set-size
November 1996	Psychonomic	Chicago, IL, USA	Re-evaluating the role of covert attention in visual search
May 1997	ARVO Annual Meeting	Ft. Lauderdale, FL, USA	The effects of cueing spatial attention on discrimination tasks
November 1997	Psychonomic	Philadelphia, PA, USA	Spatial attention improves observers' discrimination
May 1998	ARVO Annual Meeting	Ft. Lauderdale, FL, USA	The effects of cueing attention on an orientation texture segregation task
August 1998	European Conference on Visual Perception	Oxford, UK	1. Spatial attention affects acuity and texture segregation
			2. Do attentional effects differ across visual fields?
November 1998	Psychonomic	Dallas, TX, USA	Attention improves and impairs visual performance by enhancing spatial resolution
May 1999	ARVO Annual Meeting	Ft. Lauderdale, FL, USA	Attentional effects in texture segmentation as a function of the texture's spatial frequency
November 1999	Psychonomic	Los Angeles, CA, USA	The locus of the attentional effects in texture segregation
May 2001	Vision Science Society (VSS)	Sarasota, FL, USA	The effects of spatial attention on temporal resolution
August 2001	European Conference on Visual Perception	Kussadasi, Turkey	The effects of spatial attention on temporal resolution

May 2002	Vision Science Society (VSS)	Sarasota, FL, USA	Spatial attention and visual temporal processes
May 2003	Vision Science Society (VSS)	Sarasota, FL, USA	Apparent motion is less apparent with attention
May 2004	Vision Science Society (VSS)	Sarasota, FL, USA	Transient attention and the integration of information across time
May 2005	Vision Science Society (VSS)	Sarasota, FL, USA	1. Motion perception is differentially affected by the transient and sustained components of spatial attention
			2. On the flexibility of covert attention and its effects on a texture segmentation task
January 2006	Brain & Cognition Workshop	Taipei, Taiwan	The effects of transient attention on segregation and integration of spatial and temporal information
May 2006	Vision Science Society (VSS)	Sarasota, FL, USA	Transient attention and selective adaptation to high and low spatial frequencies
May 2007	Vision Science Society (VSS)	Sarasota, FL, USA	1. Evaluating the Ability of Visual Search Models Suggested for Computer-Vision to Predict Human Performance
			2. Differential effects of endogenous and exogenous covert attention on texture segmentation
May 2008	Vision Science Society (VSS)	Naples, FL, USA	Perceptual objects capture attention
May 2009	Vision Science Society (VSS)	Naples, FL, USA	1. Differential effects of transient attention on adaptation to different spatial frequencies
			2. The effects of transient attention and target contrast on crowding at different eccentricities
August 2009	European Conference on Visual Perception	Regensburg Germany	Modeling neurophysiological and psychophysical effects of attention via dynamic modulation of receptive fields
May 2010	Vision Science Society (VSS)	Naples, FL, USA	1. Temporal crowding with normal observers and its interplay with spatial crowding
			2. The attentional attraction field: modeling spatial and temporal effects of spatial attention

July 2010	Asia-Pacific Conference on Vision (APCV)	Taipei, Taiwan	Transient attention and perceptual tradeoffs
May 2011	Vision Science Society (VSS)	Naples, FL, USA	Modeling combined proximity - similarity effects in visual search
April 2012	Australian Experimental Psychology Conference	Sydney, Australia	Stimulus-driven attentional capture by objecthood
May 2013	Vision Science Society (VSS)	Naples, FL, USA	1. Differential effects of transient attention on inferred parvocellular and magnocellular processing
			2. The Attentional Attraction Field: A feed-forward model of attention
			3. Competition between grouping principles
May 2014	Vision Science Society (VSS)	St. Pete Beach, FL, USA	1. Pure irrelevance induced 'blindness'
			2. Spatial and temporal crowding with normal observers
			3. Can a competition between grouping principles be resolved without attention?
August 2014	European Conference on Visual Perception	Belgrade, Serbia	Competition between grouping principles: a primed-matching study
May 2015	Vision Science Society (VSS)	St. Pete Beach, FL, USA	The effects of precueing the target location on temporal crowding
August 2015	European Conference on Visual Perception	Liverpool, U.K	Temporal crowding and the effects of spatial attention
May 2016	Vision Science Society (VSS)	St. Pete Beach, FL, USA	1. Super-fast endogenous allocation of temporal attention
			2. Temporal attention selects compound representations in a strategic manner: Evidence from the attentional blink
May 2016	The annual meeting of SFB-TRR Perception center	Rauischholzhausen Castle, Germany	Perceptual tradeoffs shape the effects of transient attention
August 2016	European Conference on Visual Perception	Barcelona, Spain	1. Super-fast endogenous allocation of temporal attention

			2. The effects of spatial attention on temporal integration
May 2017	Vision Science Society (VSS)	St. Pete Beach, FL, USA	1. The size of the attentional window when measured by the pupillary response to light
			2. The effects of rhythm-induced attention on perceptual representation: precision analysis
			3. Temporal integration and spatial attention
			4. Temporal grouping enables selection of multiple targets in rapid streams of visual information
July 2017	Asia-Pacific Conference on Vision (APCV)	Tainan, Taiwan	Paying attention to time is faster than paying attention to space
August 2017	European Conference on Visual Perception	Berlin, Germany	1. Crowding in the time domain
			2. The size of the attentional window when measured by the pupillary response to light
			3. Temporal integration and spatial attention
			4. The typical advantage of object-based attention reflects reduced spatial cost
October 2017	Annual Conference of the Timing Research Forum	Strasbourg, France	1. Paying attention to time is faster than paying attention to space
			2. The effects of rhythm-induced attention on perceptual representation: mixture-model analysis
May 2018	Vision Science Society (VSS)	St. Pete Beach, FL, USA	1. The nature of the impairment brought about by temporal crowding
			2. Sustained spatial attention can affect feature fusion
			3. The minimal size of the attentional window is larger when measured via the pupillary light response
August 2018	European Conference on Visual Perception	Trieste, Italy	Is temporal crowding merely long-lasting masking?

May 2019	Vision Science Society (VSS)	St. Pete Beach, FL, USA	1. Differences and similarities between temporal crowding, spatial crowding and masking
			2. Are familiar rhythms a top-down – bottom-up hybrid cue of visual temporal attention?
			3. Induced pupil oscillations characterize the size of the attentional window at different levels of attentional load
July 2019	Asia-Pacific Conference on Vision (APCV)	Osaka, Japan	The characteristics of the attentional window when measured with the pupillary response to light
June 2020	Vision Science Society (VSS)	Virtual meeting due to COVID 19	1. The effects of spatial attention on temporal integration measured with the Ternus display
			2. Pupillometric measurements reveal the characteristics of the attentional window
			3. Using attentional modulation of the pupillary light response to study the mechanisms underlying object-based attention
August 2021	European Conference on Visual Perception	Virtual meeting due to COVID 19	1. Using attentional modulation of the pupillary light response to examine different accounts of object-based attention
			2. Temporal Crowding at the Fovea: Online and Lab studies
			3. Cross-language comparison of semantic and phonological priming from crowded words: The case of Chinese vs. Hebrew
			4. Does attending to a time point result in temporal suppression at other time points?

b. Participation in International Conferences - Held in Israel

Date	Name of Conference	Place of Conference	Subject of Lecture/Discussion
September 1998	European Society for Cognitive Psychology	Jerusalem, Israel	The effects of cueing spatial attention on acuity and texture segregation tasks
April 2010	Selection and Control Mechanisms in Perception and Action	Jerusalem, Israel	1. Transient attention and the interplay between the temporal and spatial domains of perception
			2. Do object-based effects merely reduce spatial costs?
			3. The Attentional Attraction Field: Modeling spatial and temporal effects of spatial attention
			4. Perceptual load in central and peripheral regions and its effects on performance
June 2016	Sensing: from minds to Machines	Ber Sheva, Israel	The reciprocal relations between attention and perceptual organization
April 2017	International Conference in Vision Science: "From Basic Research to Clinical Applications"	Bar-Ilan University, Israel	Crowding in the time domain

c. Participation in Local Conferences

Date	Name of Conference	Place of Conference	Subject of Lecture/Discussion
October 2004	The Israeli Society for Cognitive Psychology	Ramat Gan	Differential effects of the transient and sustained components of spatial attention
March 2013	Annual Meeting of The Israeli Society of Vision and Eye Research	Airport City	Crowding modulations by spatial attention, stimuli contrast, and object formation
February 2014	1 st Israel Cognitive Psychology meeting (ISCoP)	Akko	1. Attentional attraction of receptive fields can explain spatial and temporal effects of attention
			2. Spatial and temporal crowding with normal observers
			3. Effects of stimuli contrast and pre-cueing attention in crowding

			4. The efficiency of attentional selectivity and perceptual load
February 2015	2 nd Israel Cognitive Psychology meeting (ISCoP)	Akko	1. The effects of precueing the target location on temporal crowding
			2. Temporal and spatial integration at different regions of the visual field
			3. Competition between grouping principles: a primed-matching study
February 2016	3 rd Israel Cognitive Psychology meeting (ISCoP)	Akko	1. Temporal crowding and the effects of spatial attention
			2. The effects of spatial attention on temporal integration
			3. Temporal attention selects compound representations in a strategic manner: Evidence from the attentional blink
February 2017	4 th Israel Cognitive Psychology meeting (ISCoP)	Akko	1. The size of the attentional window when measured by the pupillary response to light
			2. The effect of rhythm-induced attention on perceptual representation precision analysis
			3. Temporal grouping enables selection of multiple targets in the attentional blink paradigm
			4. Temporal integration and spatial attention
February 2018	5 th Israel Cognitive Psychology meeting (ISCoP)	Akko	1. The size of the attentional window when measured with the pupillary response to light
			2. Can Familiar Rhythm Entrain Temporal Attention?
			3. Sustained spatial attention can affect feature fusion
			4. In the attentional blink, temporal expectancy may be limited to the first target
			5. Does the size of the attentional window scale with eccentricity?
February 2019	6 th Israel Cognitive Psychology meeting (ISCoP)	Akko	1. How does the Size of the Attentional Window Vary with Eccentricity?

			2. The Effect of Spatial Attention on Perceived Motion in Ternus-Pikler Displays
			3. Priming from crowded words in an alphabetical language
			4. Are familiar rhythms a top-down – bottom-up hybrid cue of temporal attention?
			5. The time-course of rhythm-based temporal attention
February 2020	7 th Israel Cognitive Psychology meeting (ISCoP)	Akko	1. The time course of temporal attention
			2. Individual differences in internal noise predict effects of spatial attention
February 2021	8 th Israel Cognitive Psychology meeting (ISCoP)	Virtual meeting due to COVID 19	1. Priming from crowded words in an alphabetical language
			2. Exploring the interference of temporal crowding with Mixture-Model Analysis

d. Organization of Conferences or Sessions

Year	Name of Conference	Place of Conference	Subject of Conference	Role
2004	General Meeting of The Israeli Society for Cognitive Psychology	Bar Ilan	Cognitive psychology	Conference organizer
2010	Selection and Control Mechanisms in Perception and Action	The Israel Institute for Advanced Studies, Jerusalem	Attention and control mechanisms	Conference organizer
2010	Asia-Pacific Conference on Vision (APCV)	Taipei, Taiwan	Transient attention and perceptual tradeoffs	Symposium organizer
2019	Asia-Pacific Conference on Vision (APCV)	Osaka, Japan	Studying attention without relying on behavior	Symposium organizer

7. Invited Scholarly Lectures

a. Abroad

Year	Place of Lecture	Name of Forum	Subject of Lecture
June 2003	San Miniato, Italy	International Workshop on Visual Attention	Transient spatial attention and visual temporal processes
January 2006	Taipei, Taiwan	Brain & Cognition Workshop	The effects of transient attention on segregation and integration of spatial and temporal information
March 2007	Buenos Aires, Argentina	2 nd International Workshop on Visual Attention	Stimulus-driven attentional capture by objecthood
July 2010	Taipei, Taiwan	Asia-Pacific Conference on Vision (APCV)	Transient attention and perceptual tradeoffs
June 2011	Bielefeld University, Germany	CITEC Colloquium	Transient attention and the interplay between the temporal and spatial domains of perception
October 2011	Allahabad, India	3 rd International Workshop on Visual Attention	Transient attention and perceptual tradeoffs
July 2013	Bielefeld University, Germany	CITEC Vision Science Colloquium	Differential effects of transient attention on inferred parvocellular and magnocellular processing
January 2014	École polytechnique fédérale (EPFL), Lausanne, Switzerland	Vision and Cognition (V&C) seminar	Transient attention and perceptual tradeoffs
March 2014	ZiF - Center for Interdisciplinary Research, Bielefeld, Germany	Competitive visual processing across space and time: Interactions with memory	The fate of irrelevant stimulation
July 2015	Tuebingen University, Germany	Psychology Department Colloquium Tuebingen	Transient attention and perceptual tradeoffs
October 2015	University of Birmingham, UK	Cognitive Neuroscience Seminar Birmingham	Transient attention and perceptual tradeoffs

December 2017	Université de Lyon, Lyon, France	ImpAct – Lyon Neuroscience Research Center, Inserm	Perceptual tradeoffs shape the effects of transient attention
July 2017	China Medical University, Taichung, Taiwan	Graduate Institute of Biomedical Sciences	Effects of attention in space and time
June 2018	Bielefeld University, Germany	CITEC Vision Science Colloquium	Paying attention to time
August 2019	Tohoku University, Japan	RIEC Seminar	Perceptual tradeoffs shape the effects of transient attention
September 2019	Tohoku University, Japan	RIEC Seminar	Paying attention to time
December 2019	Ecole normale supérieure, Paris, France	Laboratoire des Systèmes Perceptifs Seminar	The characteristics of the attentional window when measured with the pupillary response to light
November 2021	Brown University, USA	Perception & Action Seminar Series	What is the nature of temporal crowding?

b. In Israel

Year	Place	Name of Forum	Subject of Lecture
July 2005	University of Haifa, Israel	The Minerva Workshop Series	The effects of transient spatial attention on visual temporal processes
April 2010	Jerusalem, Israel	Selection and Control Mechanisms in Perception and Action	Transient attention and the interplay between the temporal and spatial domains of perception
June 2019	Mitzpe Ramon	The 6 th JBC Annual Retreat	The characteristics of the attentional window when measured with the pupillary response to light

8. Colloquium or Seminar Talks

Year	Place	Name of Forum	Subject of Lecture
April, 1998	New York University, NY, USA	Perception and Cognition Minisymposium	Attention Enhances Spatial Resolution
March, 1999	Ben-Gurion University	Behavioral sciences colloquium	The nature of the attentional mechanisms: support for enhanced resolution

March, 1999	Tel Aviv University	Cognitive psychology colloquium	The nature of the attentional mechanisms: support for enhanced resolution
March, 1999	Hebrew University	Cognitive psychology colloquium	The nature of the attentional mechanisms: support for enhanced resolution
March, 1999	Technion	Behavioral sciences colloquium	The nature of the attentional mechanisms: support for enhanced resolution
March, 2001	Technion	Brain and Behavior Seminar	The nature of the attentional mechanisms: spatial resolution enhancement
April 2003	Weizmann Institute	The department of neurobiology colloquium	Spatial attention and visual temporal processes
October 2003	Tel Aviv University	Cognitive psychology colloquium	The effects of transient spatial attention on visual temporal processes
May 2004	Hebrew University	Cognitive psychology colloquium	The effects of transient attention on spatial and temporal processes
April, 2007	Ben-Gurion University		The effects of transient attention on segregation and integration of spatial and temporal information
August 2011	Sydney University, Australia	Brain and Behavior colloquium	Transient attention and the interplay between the temporal and spatial domains of perception
August 2011	University of New South Wales Australia	Experimental psychology colloquium	Transient attention and the interplay between the temporal and spatial domains of perception
November 2011	Macquarie University, Australia	Brain and Behavior colloquium	Transient attention and perceptual tradeoffs
June 2015	Tel Aviv University	Cognitive psychology colloquium	Transient attention and perceptual tradeoffs
June 2015	Hebrew University	Cognitive psychology colloquium	Differential effects of transient attention on inferred parvocellular and magnocellular processing
November 2015	Ben-Gurion University	Zlotowski Neuroscience colloquium	Transient attention and perceptual tradeoffs
December 2015	Ben-Gurion University	Vision Seminar	The effects of attention on segregation and integration of spatial and temporal information
February 2016	The Open University	Cognitive psychology Seminar	Transient attention and perceptual tradeoffs
December 2019	Bar-Ilan University	Vision Science seminar	The temporal domain of crowding

January 2020	Ben-Gurion University	Zlotowski Neuroscience colloquium	The characteristics of the attentional window when measured with the pupillary response to light
January 2021	Bar-Ilan University	Vision Science seminar	What is the nature of temporal crowding?
December 2021	Tel Aviv University	Psychology departmental colloquium	The pupillary light response as a continuous and objective measure of attention allocation

9. Research Grants

Years	Role in Research	Other Researchers	Title	Funded by	Amount
2001-2004	PI		The effects of visual spatial attention on visual temporal processes	The Israel Science Foundation (ISF)	\$75,000
2001-2002	PI		Binocular rivalry and the relationships between spatial attention and awareness	Israel Foundation Trustees (FORD)	\$6720 - Waved
2002	PI		Reality Center for attention and perception	ISF Equipment	\$170,000
2002-2005	Co-PI	M. Carrasco Co-PI	Are transient and sustained attention adaptable: Can they both increase and decrease spatial resolution?	United States Israel Binational Science Foundation (BSF)	\$144,000
2005-2008	PI		Transient attention and the temporal impulse response	The Israel Science Foundation (ISF)	\$106,000
2006-2009	CI	R. Kimchi PI	Perceptual organization and visual attention: stimulus-driven attentional capture by a perceptual object	The Israel Science Foundation (ISF)	\$75,000
2009-2010	PI		A systematic evaluation of in-car warning systems under varying conditions of perceptual load	The Ran Naor Foundation	\$21,000
2009-2010	Co-PI	J. Norman Co-PI, P. Setter CI,	The effects of billboards on driving as a function of type of billboard, their size, and density	The Israel National Road Safety authority	\$65,000

		T. Toledo CI			
2009-2011	PI		The effect of perceptual load on driving quality and the usability of in-car warning systems	The Research Fund on Insurance Matters	\$42,000
2011-2013	PI		Attention as an attraction field (AAF): The development and evaluation of a novel model of spatial attention	The National Institute for Psychobiology in Israel (NIPI)	\$100,000
2011-2014	Co-PI	J. Norman Co-PI, P. Setter CI	The influence of advertizing billboards on the attention allocation of drivers	The Research Fund on Insurance Matters	\$120,000
2013-2017	PI		The time course of temporal attention and its effects on basic perceptual processes	The Israel Science Foundation (ISF)	\$183,000
2018-2021	Co-PI	W. Einhäuser Co-PI	Objective Measurements of Perception and Attention	The German-Israeli Foundation (GIF)	€195,000
2019-2024	PI		The temporal domain of crowding	The Israel Science Foundation (ISF)	\$285,000

10. Scholarships, Awards and Prizes

Years	Name of Award	Purpose of Award or Achievement	Source
1994-1999	GSAS Teaching Assistant award	Funding for graduate studies	New York University (NYU)
1997	GSAS Predoctoral Summer Fellowships	Summer funding for outstanding graduate students	New York University (NYU)
1998	Katzell Summer Fellowship	Summer funding for excellent doctoral students	Katzell Fellowship
2000-2003	Alon Fellowship	Recruitment of outstanding young scientists	VATAT (The Council for Higher Education)
2002	Bergmann Memorial Award	Awarded to a young scientist who is recipients of new BSF grants	United States Israel Binational Science Foundation (BSF)

11. Teaching

a. Courses

Years	Name of Course	Type of Course	Level	Students Number
1994-1995	Introduction to Psychology	Recitation	BA	30
1995-1998	Perception	Recitation	BA	30
1996-1999	Research Methods in Perception	Recitation	BA	20
2000- present	Perception	Lecture	BA	100
2001- 2017	Perception & Attention	Research Seminar	BA	10
2001- present	Sensation & Perception	Seminar	MA, PhD	10
2002- present	Research Practicum	Seminar	MA, PhD	10
2010 -present	Attention & Performance	Seminar	MA, PhD	10
2017- present	Perception & Attention	Lab Seminar	BA-PhD	10

b. Supervision of Graduate Students

Name of Student	Name of Other Mentor	Title of Thesis	Year
Master's Students			
Golan Marom		The effects of spatial transient attention on duration estimation	2003
Avshalom Erlich		Temporal integration as a tool to improve images perception	2004
Tomer Carmel		Implicit learning demands awareness to the subjects of the underlying rule	2007
Gilad Sabo		The effects of transient attention on pulsed vs. steady detection tasks	2009
Einat Rashal		Attention and crowding	2009
Yamit Provisor		Competition between two attentional cues: gaze and singleton	2013
Ruth Peled	R. Kimchi	Figure-ground organization and the watercolor illusion	2014
Tamar Hanania		Moods effects on color perception	2014

Shira Tkacz-Domb		Spatial attention and temporal crowding	2014
Shai Aviram	Y. Bloch	The effect of attention functions on arithmetic task performance under different display conditions	2016
Joshua Kotler	R. Kimchi	Figure-ground organization and inattentive blindness	2017
Ph.D. Students			
Hadas Marciano		Perceptual load in different regions of the visual field and its relevance for driving	2012
Einat Rashal	R. Kimchi	Competition in the process of perceptual organization	2015
Ilanit Hochmitz		Attention and information integration over time and space	2019
Shira Tkacz-Domb		The relations between attention in time and space and pupil size	2019
Asaf Elbaz		Temporal attention and rhythm in visual discrimination tasks: the role of familiarity, and meter structure	2019
Felipe Luzardo		Exploring the relationship between internal noise and attention	In progress
Tomer Sahar	T. Makovski	The consequences of visual attention	In progress

PUBLICATIONS

A. Ph.D. Dissertation

Title:	How does attention aid visual perception: support for enhanced resolution
Date of submission:	September 1999
Number of pages:	162
Language:	English
Name of supervisor:	Marisa Carrasco
University:	New York University
